## reSource transmedial culture berlin

Since 2011, transmediale has an all-year ongoing activity in the form of a new project platform and a residency programme. These activities provide a sustainable structure of feedback, research and reflection that interacts with the yearly festival.

The reSource for transmedial culture is a new framework for transmediale festival related projects that happen throughout the year in the city of Berlin. It is an initiative that extends into ongoing activities with decisive touchdowns at each festival. The objective of the reSource for transmedial culture is to act as a link between the cultural production of art festivals and collaborative networks in the field of art and technology, hacktivism and politics. The reSource works within the aegis of facilitating collaboration and the sharing of knowledge between the transmediale festival and the local and translocal scene engaged with art and digital culture in Berlin.

Among the reSource partners are: CTM/DISK, Kunstraum Kreuzberg/Bethanien and the Post-Media Lab of the Leuphana University of Lüneburg.
